

Xewkija, GOZO

Offering this new exclusive luxurious project offers a large yard or garden surrounded by other structures, which at that time mainly covered walkways. Inspired by the traditional architectural features Gozo offers, especially with its natural stone craftsmanship. It respects the streetscape and enhances the traditional facades by restoring and integrating an existing imposing townhouse front. 19 spacious and well-planned residential units are on offer, all facing a large common yard with a communal pool and landscaping. An oven/barbecue area compliments the facilities at the very back. Some of the penthouses offer an interconnected private roof garden with a pool. All units have large private terraces. Garages come serviced directly with 6-person passenger lifts. Each unit enjoys the use of roof space for PV panels.
